## TOP FORAGE SORGHUM

### HUNNiGREEN
(Sweetsorghum x Sweetsorghum)
- Most versatile forage sorghum
- Ultra-late flowering ensures extended growth period
- Excellent for foggage (Grazing in winter)
- High sugar content ensures top silage quality
- Very good regrowth ability
- Grazing/foggage/silage/green chop

### HONEYMAX
(Sweetsorghum x Sweetsorghum)
- Most versatile forage sorghum
- Ultra-late flowering ensures extended growth period
- Excellent for foggage (Grazing in winter)
- High sugar content ensures top silage quality
- Very good regrowth ability
- Grazing/foggage/silage/green chop

### SUPA SWEET II
(Sweetsorghum x Sweetsorghum)
- Very high sugar values
- Excellent regrowth capacity
- Well suited for summer grazing
- Very good early season silage

### AGFLASH/NIAGARA II
(Sorghum X Sudangrass)
- Sputed for repeated grazing or cutting
- Excellent for summer grazing
- Best suited for cattle and sheep
- High yield potential.
- For intensive and extensive production systems
- First grazing/cutting at 1m

### AGRIGREEN
(Pennisetum Glaucum)
- Hybrid Pearl Millet
- No prussic acid danger
- Can be grazed/cut within 4-6 weeks after sowing
- Suited for sheep, cattle and horses
- Palatable, high quality forage
- First grazing height at 30-50cm

### Varieties Table
